### GABANINTHA VANADIUM PROJECT

Yellow Rock Resources Ltd (ASX Code: YRR) announced earlier today that it had acquired the remaining 20% interest in exploration licence E51/431 at the Gabanintha Vanadium Project south of Meekatharra in Western Australia.

The announcement referred to the previous mineral resource estimate for the Gabanintha Vanadium Project announced by the company on 5 August 2008 of an indicated resource of about 90 million tonnes at 0.81% vanadium pentoxide (V<sub>2</sub>O<sub>5</sub>).

That estimate together with other minerals information contained in this announcement and the earlier announcement of 5 August 2009, to the extent that it relates to exploration results, is based on information compiled by Peter Schwann, CP (Geol), who is a Fellow of the Australasian Institute of Mining and Metallurgy.

Mr Schwann:

- a) is a consultant to Yellow Rock Resources Ltd and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2004 Edition of the "Australian Code for Reporting of Mineral Resources and Ore Reserves"; and
- b) consents to the inclusion in this and the earlier announcement of today of the matters based on information in the form and context in which they appear.
